

Illuminated Products

AdGlo® illuminated signs provide maximum design flexibility by permitting the actual reproduction of logos, graphics and letterforms rather than neon's tubular representations. The result is a noticeably more upscale appearance which demands attention, builds brand awareness and adheres to identity specifications. AdGlo® custom products are offered in three basic configurations; Intralight, Contour and Backlight. These proprietary, lightweight sign products can be illuminated with any combination of five standard colors - red, amber, blue, green and white. The electronic circuitry is compactly encased in a housing which is less than 1" thin. Send us your artwork for an AdGlo® evaluation and project quote.

AdGlo®

Custom Design Applications

AdGlo® illumination can be adapted to many custom applications. Add brilliant, glowing color to products, props, merchandising displays and much more. Push the limits of your imagination to include AdGlo® illuminated products.

CUSTOM SIGNAGE

Intralight

The text, logo or graphic is slightly raised and glows internally, producing an exact reproduction of the original art. Intralight sign elements can be as small as 1/2" high. The maximum illuminated area width is 2 1/2".

Double-Sided Intralight

The text, logo or graphic remains raised with an internal glow, but is viewable from both sides of this ultra-slim design - 3/8" thin. The maximum letter height remains 2 1/2". Symmetrical designs produce the best results in multi-color applications.

Contour

The body of the letter, logo or graphic is non-illuminated, while the illuminated edge forms an outline of each element. The glowing outline is 1/4" wide. Non-illuminated elements must be at least 1" wide and no more than 36" high each.

The AdGlo® Advantage

- Exact Custom Reproductions
- Sizes From 1/2" High
- Safe, Easy Installation
- Long Life Expectancy
- Lightweight
- Low Voltage
- No Fragile Glass
- Highly Luminous
- Energy Efficient

Backlight

The illumination of this method radiates from the back of the letter or graphic creating a halo of surrounding light. The letters, logos or graphics are mounted with or without spacers to create the desired area of glow that is cast onto the background panel or wall.

Illuminated Badges

Permanent or scrolling message badges are an eye-catching way to display a name, logo or promotional text. The permanent message badge measures 2" h x 3 1/4" w with a raised, glowing text in red, blue or green and no larger than 1/2" h x 2" w. The scrolling message badge (red only) is easily programmed with simple to use computer software (included).

Scrolling

Permanent

Standard AdGlo® Signs

Standard ATM and Open signs are readily available in highly luminous, red Contour and Intralight designs. These storefront attention-grabbers ship complete with hanging hardware and 12-volt transformer. The on/off switch is conveniently located in the power cord for easy operation.
